

Repudiation notice of any form of oppression/segregation/prejudice for the reason of gender, race, sexual orientation and against minorities in general

Since its first term in charge, the current Committee of the Brazilian Logic Society has made several efforts for supporting effective actions to increase plurality, diversity, and inclusion in the Brazilian community of logicians.

Seeking to remain strictly coherent with such initiatives, we hereby publicly declare our repudiation of any prejudicious, excluding, segregationist, hypersexualizing and/or objectifying attitude. All of our communal actions are grounded upon the ideals of plurality of ideas and respect for diversity in general, whether in relation to groups, gender, ethnicity or beliefs. We believe this very Society is grounded upon the same principles.

Committee of the Brazilian Logic Society 2019-2021.
